Create unique universes

Create unique universes that elevate the very act of eating or resting to another level. In hotels and restaurants, every detail matters to transform a stay into an unforgettable experience.

It's about generating emotions, awakening the senses, and transporting each guest to a different place where time is experienced in a new way.

On that journey, furniture becomes an essential part of the story: it accompanies, inspires, and shapes environments that are much more than spaces.

At Enea, we design premium, versatile, and durable furniture capable of enhancing these settings to create experiences that connect with people and elevate them beyond the ordinary.

Our own way of doing things

Manufactured in the Basque Country

Our factory is located in Legorreta, a place where nature coexists with an industrial tradition that has made the Basque Country an international benchmark. Perhaps that's why we place such importance on excellence in every stage of the production process and on caring for the environment in which we work.

Premium materials

We carefully select every component that forms part of our products to ensure their performance under continuous use. Woods, metals, upholstery, and finishes are chosen based on criteria of stability, strength, and long-term behavior.

Internal testing

We have a rigorous testing process to validate the performance of all the components that make up our products. We assess loads, fatigue, stability, and finish resistance in real-life scenarios to guarantee optimal performance from day one.

Signature designs

Our products are born from an aesthetic and functional vision that allows them to fit into a wide variety of everyday spaces. For their design, we collaborate with leading studios such as Estudi Manel Molina, Josep Llusçà, and Gabriel Teixidó. A commitment to design that earned Enea the National Design Award in 2022.

SCS Indoor Advantage Gold

The Indoor Advantage Gold certification demonstrates that our tables and chairs ensure healthy indoor air quality by complying with strict regulations on volatile organic compound (VOC) emissions.

AENOR Environmental Management (ISO 14001)

The ISO 14001 certification ensures that we have an environmental management system that allows us to optimize resource and waste management and reduce the negative environmental impacts resulting from the design and production of furniture.

AENOR Ecodesign (ISO 14006)

The ISO 14006 certification confirms that Enea has a management system to identify, control, and improve the environmental impacts that may occur at each stage of our furniture's life cycle, with the aim of reducing them to a minimum.

AENOR Quality Management System (ISO 9001)

The ISO 9001 standard confirms that Enea has a quality management system that helps us organize and systematize processes for managing and improving the design and production of our furniture.

AENOR Quality Management System (ISO 9001)
